PROFESSIONAL PROFILE

Industrial Engineer with a systems-oriented profile, specialized in data, automation, business intelligence and digital product development. Experienced in transforming operational needs into scalable solutions using Python, SQL, Qlik Sense and web technologies, while leading cross-functional projects from definition to adoption.

PROJECT & BUSINESS SKILLS

Project leadership | Agile methodologies | Stakeholder management | Problem solving | Process optimization | Continuous improvement | Adaptability to change

PROFESSIONAL EXPERIENCE

Sr Data Analyst | Smart Manufacturing Digital Leader

Pirelli Neumáticos | Merlo, Buenos Aires | May 2023 — Present

Data, automation, digital products and cross-functional project coordination.

- Develop report automations and data workflows using Python, Pandas, SQL and scheduled processes.
- Build web applications with Angular, Flask and APIs for real-time monitoring of operational KPIs, alerts and process status.
- Create Qlik Sense dashboards and BI solutions for trends, deviations, statistics and post-mortem analysis.
- Integrate data from multiple sources into reliable datasets for operational and management reporting.
- Lead cross-functional digital initiatives, coordinating requirements, priorities, validation, deployment and user adoption.

Senior Process Engineer

Pirelli Neumáticos | Merlo, Buenos Aires | August 2019 — April 2023

Process performance, productivity, cost saving and continuous improvement.

- Monitored industrial KPIs and analyzed deviations to support operational decision-making.
- Coordinated productivity improvement actions through data analysis and root-cause identification.
- Developed cost-saving initiatives focused on cost reduction, production gains and resource efficiency.
- Defined, documented and audited manufacturing processes and operational standards.
- Automated recurring reports to reduce manual work and improve performance visibility.

SELECTED DIGITAL SOLUTIONS

Report Automation & Data Pipelines

Automated operational and management reports using Python, SQL and scheduled data workflows, reducing repetitive work and improving information reliability.

Python | Pandas | SQL | ETL

Real-Time Web Tools

Web applications built with Angular, Flask and APIs to centralize KPIs, alerts and operational status for industrial teams.

Angular | Flask | REST APIs | JavaScript

BI & Advanced Analytics
Qlik Sense dashboards and analytical models for trend analysis, performance comparison, deviation detection and post-mortem evaluation.

Qlik Sense | Dashboards | KPIs | Analytics

CORE STACK

Python | Pandas | Selenium | SQL | PostgreSQL | Athena | ETL | APIs | Data Integration | Qlik Sense | Tableau | Dashboards | KPI Management | Trend Analysis | Root-Cause Analysis | Angular | Flask | HTML | CSS | JavaScript | TypeScript | REST APIs | Git | GitLab | CI/CD | AWS | Docker | Rancher | Kubernetes

EDUCATION

Industrial Engineer
Universidad Nacional de La Matanza | Graduated
